

LakshAAA Radius

Intelligent RADIUS AAA for Modern ISP Broadband Networks

Authentication • Authorization • Accounting • Policy • Quota • Operations

Modern AAA for Broadband Networks

LakshAAA Radius is an operator-focused RADIUS AAA platform designed for ISP broadband networks.

It combines subscriber authentication, policy enforcement, session management, quota/FUP, operational visibility and portal-based operations into a single operator-focused solution.

Built for ISP Operations

Subscriber Authentication

High-performance RADIUS authentication supporting multiple authentication methods and flexible subscriber identities.

Session Management

Online sessions, accounting history, concurrent session control and operational session visibility.

Operations

Runtime operations, live tracing, health monitoring and diagnostics.

Policy Engine

Flexible authentication flows based on NAS vendor, RADIUS attributes and subscriber identity, with configurable policies and reply profiles.

Quota & FUP

Quota plans, tier transitions, top-ups and automated enforcement using CoA and Disconnect.

Integration

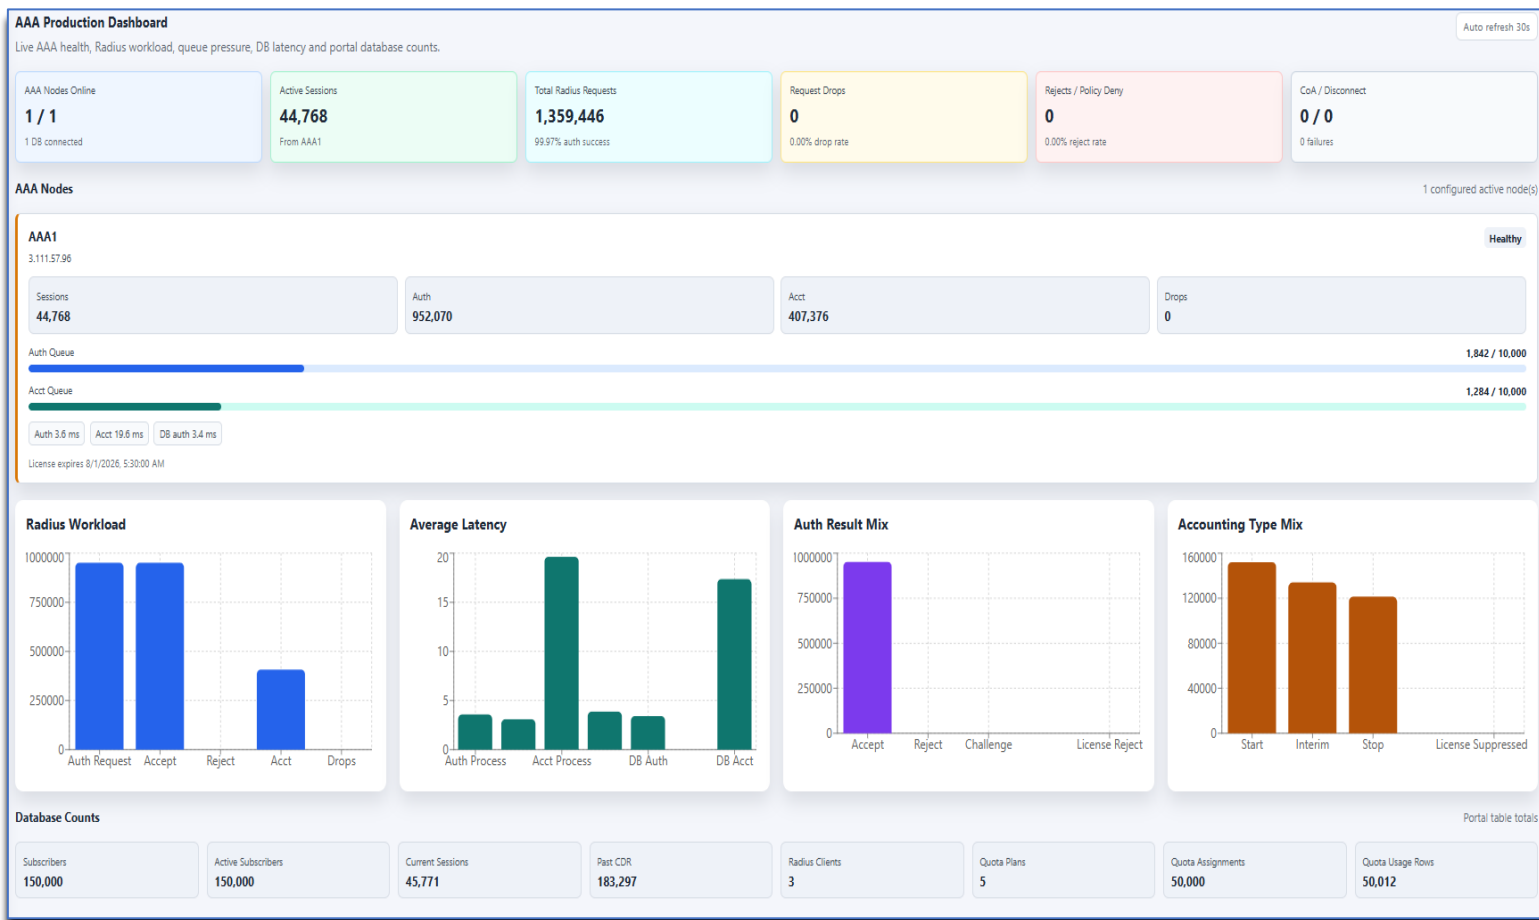

REST APIs for OSS/BSS integration and multi-node deployment.

Why Operators Choose LakshAAA?

- ✓ Operator Focused
- ✓ Operational Visibility
- ✓ Flexible Authentication
- ✓ Quota Enforcement
- ✓ High Performance

OPERATE WITH CONFIDENCE.

Complete Operational Visibility

Portal Capabilities

Subscriber Management

Provision subscribers, manage identities, profiles and passwords.

Reports & Analytics

Authentication trends, accounting reports, NAS activity, usage statistics and AAA performance.

AAA Operations

Reload runtime configuration, perform test authentication, Disconnect and operational commands.

Role-Based Administration

Role-based permissions, audit logging and secure operational workflows.

Operational Highlights

- ✓ Live Trace
- ✓ Metrics
- ✓ Active Sessions
- ✓ Audit
- ✓ Portal APIs
- ✓ SNMP
